## POWERPERFECTOR INSTALLATIONS GENERATING CASH FLOW AND PROFITABILITY FOR IRISH HOTELS

IHF Offer Edition

Free Powerperfector Assessment for all IHF members and 5% Discount on units purchased or leased in 2015.

### New 3-Year Lease Purchase Option

Gowan Energy Management Services have teamed up with Bank of Ireland Finance to provide a lease purchase finance product for the implementation of Powerperfector Projects specifically in the Hotel Sector.

This means that most Hotels can now either implement this energy efficiency measure, on the basis of a two year payback for a capital investment or without any capital outlay over a 36 month lease, enjoying positive cash flow of between €1000 and €2500 per annum during the lease period.

This will rise to the full value of the savings after the 36 months and will continue for the full expected 50 year life-cycle of the unit. Every installation comes with a 15-year warranty and there is no on-going maintenance costs associated with the unit.

# Hotel Case Studies

## Maldron Hotel Cardiff Lane

Savings in Electricity of 9.1%

Cost Reduction of € 16,050 per annum

5 additional Maldron Hotels installing Powerperfector Units.

## Hilton Hotel Manchester Airport.

Savings in electricity of 16.5%

“ Cost reduction of £17,720 per annum.

Improving the environmental performance of our pubs is very much about engineering the right solutions for our premises. Our new-build and refurbishment programmes put us in an excellent position to design in these improvements from the outset.” Andy Kershaw Group Facilities

Marstons : Average 9% electricity reduction across 40 inns and taverns.

# Hotel Case Studies

## Academy Plaza Hotel

**11.2% Electricity Savings**

**Cost reduction of €18,200 per annum**

## Warner Leisure Littlecote House

**11.5% electricity savings**

**Cost reduction not disclosed.**

Over the last three years Powerperfector have installed Voltage Power Optimizers in numerous hotels across Ireland achieving an average reduction in electricity consumption of 9%.

In most cases the savings exceeded or were in line with the prediction put forward in the business case. We are conservative in our estimation of savings achievable in each hotel and as a result are achieving the targets that we put forward.

We are part of a large family owned group that has been trading since 1969 with a track record of ethics and fairness in business.
