The Covid 19 world pandemic has presented us all with several challenges least of all keeping our businesses afloat. ECOCOOL can assist you in how best to deal with your beer pouring and refrigeration needs while the lockdown is in force. ECOCOOL can also advise on what measures to take when reopening.

## Maintain your equipment during Covid 19 lockdown

It is advisable to power off all equipment to avoid unnecessary running costs while machinery is not being used. Follow the below instructions in relation to each product.

- **Ice Machines**

Power off the machine.  
Empty the hopper completely.  
Clean the interior ice bin and leave dry.

- **Glasswashers**

Use a good quality detergent to clean out the machine by running 4 cycles. Clean inside with a small brush to remove accrued dirt...leave the door open and then repeat the process on re-use of machine.

- **Air Conditioning / Heat Pump**  
Turn off at power supply. Clean filters if possible. Get serviced on return to business, inc external compressor units.

**ECOCOOL REFRIGERATION**

**0567811047-www.ECOCOOL.IE**
