At ONA Water, we take great pride in providing solutions that have a positive impact on our environment. By choosing ONA Water, you're selecting a path to significantly reduce the consumption of single-use plastic bottles. Our cutting-edge monitoring system, powered by Droople's advanced technology, enables you to track your water usage in real-time and establish tailored benchmarks for your organisation, according to your operations.

MEASURING SUSTAINABILITY WITH DROOPLE

The detail

- Real-time tracking of water usage, with data accessible 24/7
- Monitoring of parameters such as; Flow, Temperature, Pressure, Turbidity & Conductivity
- Set alarm notifications for; Excessive flow, System inactivity, Filter replacement, etc
- Tangible data showing evidence of reduced costs & CO2 emissions, when using an ONA Drinking Water System to eliminate single-use plastic water bottles
