

"CAAS" CHARGING AS A SERVICE

An upfront leasing cost allows you to enjoy the benefits of EV Charging ownership without the worry of asset management.

INTRODUCTION

- You choose the type and number of chargers - and pay only a monthly rental
- Charger capital costs covered by EasyGo
- We map your business as a charging location and advertise your site to tens of thousands of EV Drivers across Ireland
- You decide the tariff that's applied for charging at your site on the EasyGo app

HOW IT WORKS

Number of charge points

You choose the chargers you want and where you wish to locate them. We can advise and support with power supply.

Installation & Commissioning

Once you're ready with an isolated power supply available we can install and commission the chargers.

Advertising your charging location

Your business can be promoted on the EasyGo Map, and if you choose, made visible to thousands of EV drivers.

Contracted Term

You can choose between 3, 5, 10 and 15 year term options with leasing costs for each unit tailored according to the term.

Revenue Collection & Re-Imbursement

Where you set a tariff for people to use the charger, we furnish you with full reporting to enable monetary re-imbursement of your share of charging revenue on a quarterly basis.

LIDL - Stores Across Ireland

OPERATING COSTS

GOOD NEWS -

THERE ARE NO OPERATING OR MAINTENANCE FEES

- Units are fully serviced and maintained through the life of the 3, 5, 10 or 15 year lease
- Software support, GSM connectivity and 24/7 call centre support costs are all covered under the contract
- The products we provide are of premium quality and design, from World Class manufacturers. This underpins our mission statement that EasyGo is "Probably Ireland's Best Car Charging Network".
